Home Country

By Slim Randles

Steve, the cowboy on the board of directors of the Mule Barn truck stop’s philosophy counter and world dilemma think tank, swears on his coffee it happened.
“Tourist guy got off the train the other day when I was down there picking up a friend,” Steve said. “He asked me if I was a real cowboy, and I allowed I probably was, because I wasn’t smart enough to get a real job. So he asked if I minded if he asked me some questions.”
Steve sipped his coffee. “I said, ‘Shoot’ and the guy says he wondered why we wore these big ol’ hats with the wide brims. So I explained to him they give us shade in summer and keep the rain and snow off our faces, and told him we could give the horse a drink by putting water in them.
“Then he thanked me and asked why we wore chaps. So I explained how they protected our legs from cactus and thorns, you know.
“He asked about wild rags like this one,” he said, touching the blue silk scarf around his neck. “I told him it filtered dust and we could tie our hats down with it in a high wind.”
“Sounds reasonable,” Doc said, “but I thought everybody knew that. Television and Westerns and all that.”
“Well, yeah,” Steve said. “Me, too. But I think this guy was from a city somewhere and didn’t watch TV or eat anything that ever had a pulse. Looked kinda puny. But he was real friendly.
“So then he asked me about saddle horns. Wanted to know if they honk. This guy was really

green, you know? He wanted to know about ropes and spurs, all kinds of questions like that. I did my best to answer him, too. Finally he says, ‘Tell me why you cowboys always wear tennis shoes.’
“So I told him we didn’t want anyone thinking we were truck drivers.”
Even the truck drivers laughed at that one. Then they threw cracker packets at Steve.

Yann Lecanu who passed through the area on bicycle from Montreal, Canada is now headed south. He said, "10,000 miles covered, under the sun and San Francisco in sight. Which means I've already covered a third of the distance that separates me from Ushuaia. I feel like the 5000 were not so long ago; as much I see them scroll by meter on a day-by-day basis, as globally I am the first surprised by this progress. Body is good, so is mind, just gotta try to keep this momentum going."

Joke Time ...

Lena came home from have cataract surgery and went into the bathroom. Ole suddenly heard a loud yell coming from out of the room. He hurried to see what was the matter. Lena said, "Look in the mirror. Who is that person staring at me. She looks so old. And so many wrinkles!" Ole just went out of the bathroom and left Lena to ponder who that person was.

Bird dog

There were these two Swedish hunter-buddies who went to Norway and bought a bird dog. Later they returned to Sweden to test the dog, but they were rather disappointed. Finally one of the guys said "We've been cheated, we might as well just give the dog away." The other Swede looked back at his buddy, "Yeah, we'll give him one more chance. Throw him up in the air again, and if he doesn't fly we'll just have to give him away to

someone else."

We collect used eye glasses in the Leader-Record office in Gonvick and at the Clearbrook-Leonard Senior Center. We do this for the Gonvick Lions Club and they are put to very good use.

Does anyone need old newspapers for their bird cages, their new puppies or for the garden center? We are getting ready to put some in the garbage bins for pick up. It would make the load lighter if we got rid of some of them before that point.

“I feel like I’ve made a difference working on renewable projects.”

Jerrid (born and raised Minnesotan)
Enbridge, Director of Project Management

“Enbridge is more than a pipeline company. It’s a company that’s participating in renewable energy projects in Minnesota and abroad. We’ve completed two solar self-power projects in the U.S.—locations where our natural gas compressor stations have about 25% of their power sourced from solar panels. It’s a company that’s doing their part and I’m really proud to be working here.”

We believe a cleaner energy future is achievable and that’s why we’re invested in low-carbon solutions:

- > **Building our renewable portfolio since 2002**
For over 20 years, we’ve been early adopters of renewable energy. Collectively, the energy from our renewable projects is enough to meet the electricity needs of about 962,000 homes.
- > **Billions invested in low-carbon solutions**
We’re adapting and modernizing our infrastructure to be cleaner and more efficient. To date, we’ve invested more than \$6 billion in renewable energy and we’re committed to spending another \$4 billion in low-carbon solutions through 2025.
- > **Net zero by 2050**
We’ve committed to net-zero emissions by 2050. And we’re holding ourselves accountable by tying compensation directly to our progress on these goals.
